

# ADPQ Sprint Demo & Retrospective

## Attendees

- Lab Zero: Adam, Brien, Chris, Clayton, Dean, Jeffrey, Matt, Sasha, Aaron

## Demo

### Product Design

- Prototype UX test with Tracey Thompson
- Design process deck with design and narrative help from Jim

### Issues

- Cart experience
- Order Report views
  - Admin
  - Requester
- "Workstation" data fix

### DevOps

- Swagger-UI

## Sprint review

### Outcomes

- Functional requirements delivered, time for a little polish & nice-to-haves

### What worked well?

- Knowledge sharing has been very strong
- Shared responsibility for testing across many devices
- Stories moving across quickly
- Managing scope creep & focus well
- Amazon Container service has been handy

### What can be improved?

- Missed checking some of the boxes within tickets (even when proper acceptance testing was completed), checked again when closed out tickets
- Working through some last-minute swagger stuff

### Notes

- Amazon went down, lost about half a day
- Reminder: Due date 3/3 2pm PST
  - TODAY 5pm is pencils down
