

ADPQ Sprint Demo & Retrospective

Attendees

- Lab Zero: Adam, Brien, Clayton, Dean, Jeffrey, Matt, Sasha, Aaron

Demo

Product Design

- Admin designs for managing orders and catalog
- Requester Account screens for managing department orders
- Admin login
- User test of Requester experience in InVision

Issues

- Header
- Navigation
- Homepage
- Footer
- Functional List View (based on Top Category & Sub-Category)
- Users can log in and out; information is protected behind login

DevOps

- Continuous deploy is set up for `develop` environment

Sprint review

Outcomes

- Homepage & header/footer views are coming together
- Close to having live environment for test

What worked well?

- Quick progress supported by focused conversations & decisions
- Additional support spinned up quickly, work & app was together to get started
- Story time afforded quick alignment
- Selective, focused design improvements for big visual impact

What can be improved?

- "Designs were still changing" - we're focused now
- Reconciling design improvements with style guide, the more distance we put in between our work & the style guide the more conversations we need

Notes

- Honor the other (non-functional) requirements
 - Administrative requirements (CG)
 - Technical approach story
 - Product Design storytelling
- Due date 3/3 2pm PST
 - Thursday EOD is pencils down
